

Security & Prosperity Partnership of North America is all about Stealth, Profit and Power for Corporate North America

Agreed to March 31st, 2005 in Waco Texas by President Fox, President Bush, Prime Minister Martin

No consultation with Legislatures or Congress

Also known as NAFTA Plus

We must join Canada and Mexico in mobilizing resistance!!!

The leaders' Joint Statement declares: "The SPP builds upon, but is separate from, our long-standing trade and economic relationships."

"The...SPP provides a framework to advance collaboration...in areas as diverse as security, trade facilitation, transportation, the environment and public works."

"No item – not Canadian water, not Mexican oil, not American anti-dumping laws – is 'off the table:' rather contentious or intractable issues will simply require more time to ripen politically."

Task Force on the Future of North America which drafted the SPP

"Multimodal corridors will include dedicated corridor for utilities and water pipeline."

Texas Dept. of Transportation.

SPP is accelerating the building of NAFTA Super-Corridors across North America to carry imported goods, tar sand oil, natural gas, and water by trucks, trains and pipelines. These half-mile wide corridors will link with Super-Ports in Halifax and Mexico needed to dock giant container ships.

Cross-border regions, like Atlantica along the US/Canada border, are being promoted by business and industry to eliminate burdensome regulations and tie in with the Super-Corridors.

We say NO WAY
